ANT OUT[®]

OMRI[™]
Listed

Botanical
Insecticide

Ant Out is a natural, botanical ant killer derived from essential oils and other natural ingredients. **Ant Out** wipes out all types of ants and controls all life stages – egg, larva, pupa, and adult. It is also effective against spiders, silverfish, crickets, and other common insect pests. **Ant Out** is a contact kill product meaning it will kill ants that come in direct contact with the spray. Ants will usually die within seconds and the effects can be seen immediately. More over, **Ant Out** helps prevent re-infestation for up to 4 weeks.

The active ingredients in **Ant Out** are listed as food grade materials so it is safe to use around children and pets, and **Ant Out** is EPA exempt from registration under FIFRA Sec. 25(b).

General Recommendations

Ant Out is suitable for homes, parks, schools, yards, gardens, or commercial applications, including organic food production.

The application rate is 2.5 fluid ounces per gallon of water. Apply by holding the spray nozzle 8 to 12 inches from area to be treated. **Ant Out** can cause discoloration of wooden surfaces, carpets, cloth, and other materials so care must be taken when applying the product. Applications in the home can be wiped down with a clean cloth afterward, if desired. Always test a small area of surface before full application. As with any pest control material, adequate coverage is important.

Benefits of Using Ant Out[®]

- Natural
- Biodegradable
- Residual Protection
- Safe to Use
- Non-toxic
