Benefits of Weed Zap:

Weed Zap is an all natural non-selective herbicide. Weed Zap “zaps” small broad leaf and grassy weeds. It’s natural ingredients will eliminate plants that are six inches in height or less. Weed Zap is a broad spectrum herbicide that is suitable for organic production.

Weed Zap is 100% biodegradable, which makes it an environmentally smart product to use around houses, schools, parks, playgrounds or anywhere people and pets are present.

Weed Zap is a natural herbicide, it’s ingredients are listed as food grade materials. For this reason, Weed Zap is exempt from EPA registration - reducing paper work and worry.

Weed Zap will not damage mature and non-green, woody plant parts and has both contact and physical modes of action.

Benefits of Weed Zap

- Pleasant Clove Scent** ●
- Easy to Mix and Apply** ●
- Suitable for Organic Production** ●
- Kills Most Weeds in 12 Hours** ●
- Kills Most Broadleaf Weeds** ●
- and Grasses**

MODE OF ACTION:

Weed Zap binds to the surface of the plant, where it translocates into the cells of the plant. Weed Zap's ingredients begin to destroy the plant cell structure through a burn down process. Results can be seen in as little as six hours after application. Weed Zap works best in non-shaded open areas, on herbaceous weeds 6" or less in height.

Contact your local JH Biotech distributor for more information.
