

AQUABOR™

Liquid Boron For Soil And Foliar Applications

PRODUCT INFORMATION

AQUABOR contains boron for soil and foliar applications. It is readily available and non-phytotoxic to plants when applied in accordance to directions. It is designed to prevent and correct boron deficiency. It may be applied with other fertilizers.

DIRECTIONS:

SHAKE WELL BEFORE USING

SOIL APPLICATION: AQUABOR can be applied before or at planting as banding or broadcast. The application rate is 1 gallon to 3 gallons per acre depending on soil conditions and application methods. For maintenance 1/2 -1 gallon per acre is recommended.

FOLIAR APPLICATION: For air application, add recommended amount to 10 gallons of water. In concentrate or dilute ground sprayers, it should be diluted with at least 100 times of water.

FIELD CROPS: Apply 1 to 4 qts. of **AQUABOR** per acre when crops are about 6-12 inches high or when deficiency symptoms appear. Repeat application in 2-4 weeks if necessary.

GRAPES, FRUIT and NUT TREES: Apply 1 to 4 qts. of **AQUABOR** per acre in early spring when new leaves have emerged or when deficiency symptoms appear. Repeat the application in about 4 weeks if necessary.

VEGETABLE CROPS: Apply 1 to 4 qts. of **AQUABOR** per acre at about 2-4 weeks after emergence, or when deficiency symptoms appear. Repeat the application in 1-3 weeks if necessary.
